

# DokuWiki

DokuWiki is a standards compliant, simple to use [Wiki](#) mainly aimed at creating documentation of any kind. It is targeted at developer teams, workgroups and small companies. It has a simple but powerful [syntax](#) which makes sure the datafiles remain readable outside the Wiki and eases the creation of structured texts. All data is stored in plain text files – no database is required.

## Download

DokuWiki is available at <http://www.splitbrain.org/go/dokuwiki>

## Read More

All documentation and additional information besides the [syntax description](#) is now maintained in the DokuWiki at [splitbrain](#) only and not included in the releases anymore.
