

Comment utiliser les dialogues avec réponse à plusieurs phrases ?

Au niveau de la reconnaissance vocale, le logiciel n'est pas capable d'analyser un ensemble de phrases d'un seul coup. L'utilisation de l'exercice impose donc de pratiquer comme ceci :

Sélectionnez le paragraphe que vous voulez pour la réponse *mais* ne prononcez dans un premier temps que la première phrase.

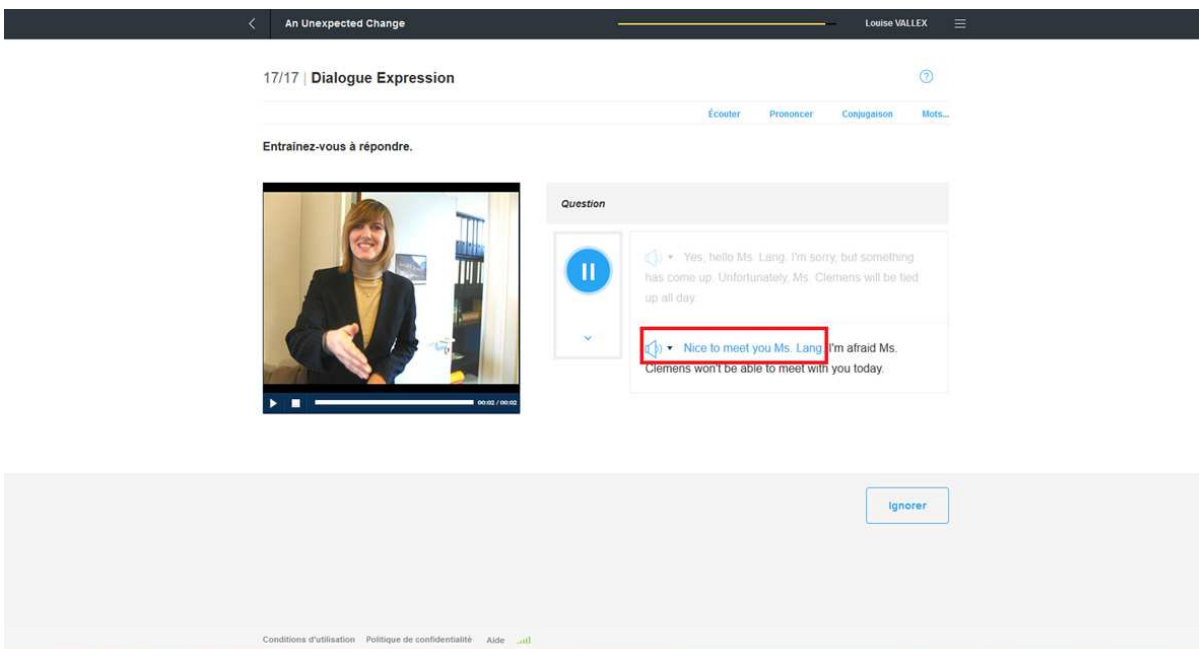

The screenshot shows the Rosetta Stone interface for a lesson titled "An Unexpected Change" by Louise VALLEX. The exercise is "Dialogue Expression" (17/17). The instruction is "Entrenez-vous à répondre." (Practice answering). On the left is a video of a woman. On the right is a "Question" box with two options:

- Option 1 (highlighted in blue): "Yes, hello Ms. Lang. I'm sorry, but something has come up. Unfortunately, Ms. Clemens will be tied up all day."
- Option 2 (highlighted in red): "Nice to meet you Ms. Lang. I'm afraid Ms. Clemens won't be able to meet with you today."

An "Ignorer" button is visible at the bottom right of the interface.

Je prononce « Nice to Meet you Ms. Lang ». Si le logiciel reconnaît et valide ma prononciation, il affiche la phrase en bleu :

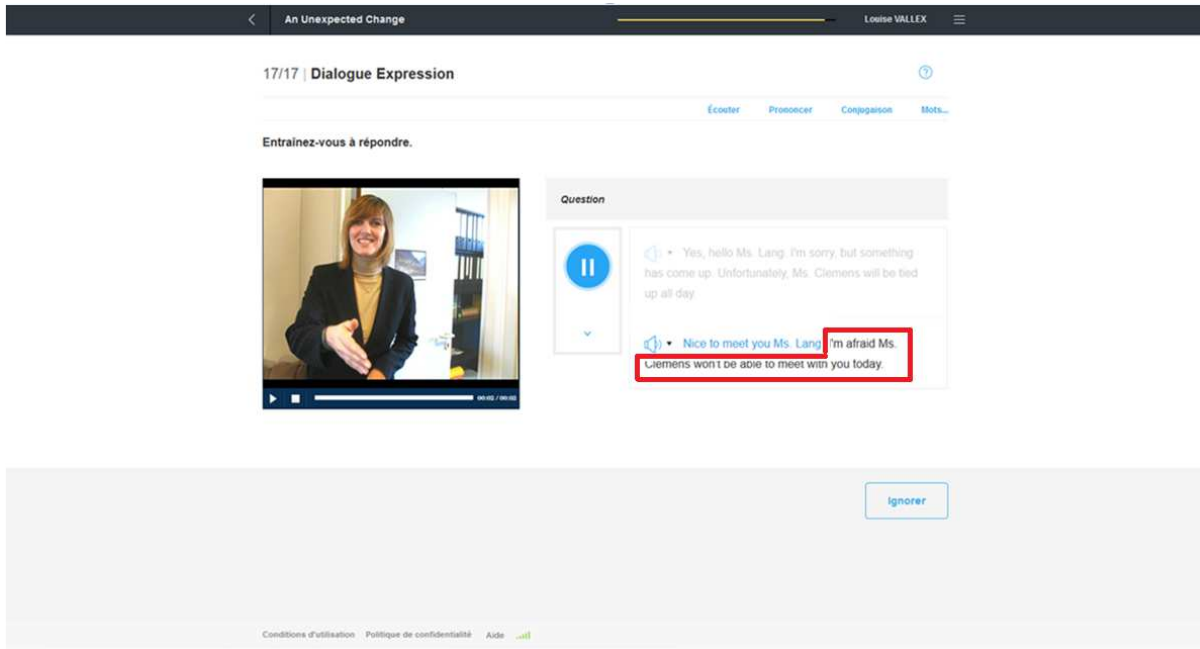

This screenshot shows the same interface as the previous one, but now the second option is highlighted in blue, indicating that the user's pronunciation was recognized and validated by the software.

Comment utiliser les dialogues avec réponse à plusieurs phrases ?

Je continue de donner ma réponse en prononçant la deuxième phrase. Si le logiciel reconnaît et valide ma prononciation, il affiche la phrase en bleu et je fais ainsi phrase par phrase :

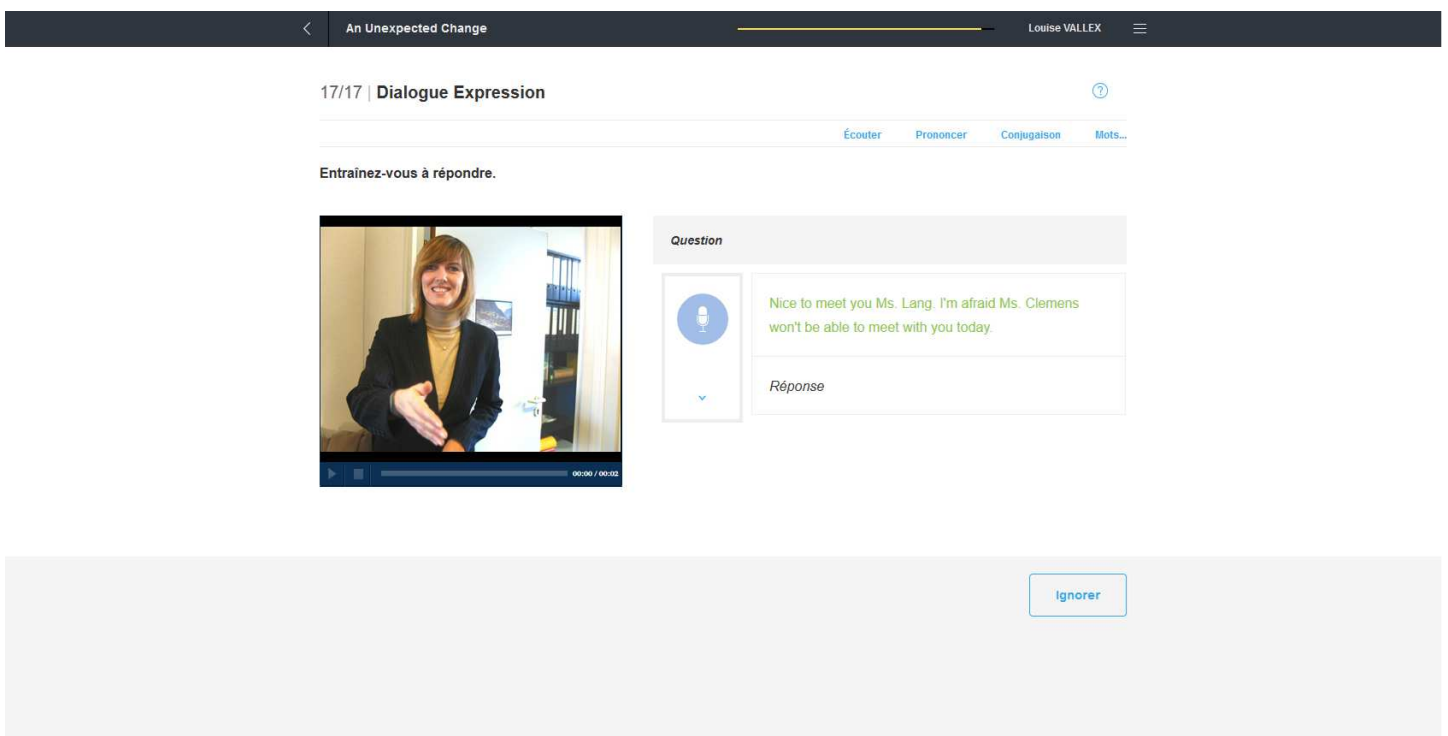

The screenshot shows the Rosetta Stone interface for a lesson titled "An Unexpected Change" by Louise VALLEX. The current exercise is "17/17 | Dialogue Expression". The instruction is "Entrenez-vous à répondre." (Practice answering). On the left, there is a video of a woman speaking. On the right, a "Question" box contains two options:

- Yes, hello Ms. Lang. I'm sorry, but something has come up. Unfortunately, Ms. Clemens will be tied up all day.
- Nice to meet you Ms. Lang. I'm afraid Ms. Clemens won't be able to meet with you today.

The second option is highlighted in blue, and a red box is drawn around it. Below the question box is an "Ignorer" button. At the bottom, there are links for "Conditions d'utilisation", "Politique de confidentialité", and "Aide".

Lorsque tout le paragraphe est terminé et validé, le logiciel affiche la réponse en vert pour vous dire que tout est correct et va alors passer tout seul au dialogue suivant.

Vous devez procéder ainsi sur tous les écrans du dialogue.

This screenshot shows the same interface as the previous one, but the second option in the "Question" box is now highlighted in green, indicating it has been validated. The text of the second option is: "Nice to meet you Ms. Lang. I'm afraid Ms. Clemens won't be able to meet with you today." Below the question box is a "Réponse" input field. The "Ignorer" button is still present at the bottom.
